The 4th International Conference on Sustainable Innovations and Partnerships SIP 2027

18–19 March 2027 | University of British Columbia (UBC)
VANCOUVER, CANADA

SIP 2027 invites original research contributions from academics, industry professionals, policymakers, practitioners, and students working at the intersection of sustainability, innovation, smart technologies, and global partnerships.

The conference provides an international platform to present new research, exchange applied knowledge, and build interdisciplinary collaborations that support sustainable development, digital transformation, and resilient communities.

CONFERENCE THEME & SCOPE

The conference focuses on sustainable innovation, responsible technology development, and partnership-based solutions for global challenges. Submissions are encouraged from engineering, energy, environment, business, education, policy, health, and social science fields. Papers may include theoretical studies, applied research, case studies, design frameworks, experimental work, policy analysis, and interdisciplinary models with practical value.

CONFERENCE TRACKS & TOPICS

- Sustainable Energy & Environment: Renewable energy, clean technologies, carbon reduction, climate resilience, and environmental management.
- Smart Technologies & Digital Innovation: Artificial intelligence, data analytics, digital transformation, automation, IoT, and smart systems.
- Sustainable Business & Economy: Green business models, entrepreneurship, circular economy, sustainable finance, and responsible management.
- Education, Society & Human Development: Sustainable education, digital learning, community development, public health, and social innovation.
- Policy, Governance & Partnerships: Sustainability policy, institutional collaboration, international partnerships, ethics, regulation, and implementation strategies.
- Engineering & Applied Sciences: Sustainable infrastructure, materials, transportation, manufacturing, construction, and applied engineering solutions.
- Interdisciplinary Sustainability Studies: Cross-sector research linking technology, society, economy, environment, and governance.

PUBLICATION & INDEXING

After successful registration and presentation, accepted papers will be considered for publication based on reviewer and Scientific Committee recommendations.

- Springer Nature – Conference Proceedings
- Sponsored Peer-Reviewed Journals
